

**METHOD AND SYSTEM FOR MANAGING THE DISPLAY OF SENSITIVE  
CONTENT IN NON-TRUSTED ENVIRONMENTS**

**ABSTRACT**

A method (10) for managing the display of sensitive content in non-trusted environments can include the steps of interrogating (12) a list of policies associated with a given user and a physical device, determining (14) a location of the physical device, comparing (18) the location of the physical device with a list of trusted locations, and enforcing (20) a plurality of rules contained in the policy by limiting or restricting access to sensitive information based on the location.
